## EXTERNAL PROGRAMS

Let us bring the universe to you!

### Digital Portable Planetarium

Our mobile planetarium is outfitted with a state of the art, full dome projector which allows us to bring the planetarium experience to you. Enjoy being flown through space in one of our astronomy shows or let your young children discover astronomy with our children's show *In My Backyard*. With multiple options to choose from, you can select the most fitting educational program for your group to view.

### Observing with Telescopes

There is no better way to learn about astronomy than actually getting to experience the sights yourself. With our large assortment of telescopes, we can allow you to safely observe the surface of the sun through our solar filtered telescopes, explore the craters of the moon, study planets of our solar system, or delve into the depths of the cosmos without ever having to leave your school.

### Educational Hands-on Activities

Activities are a great way for children to have fun while learning. We offer exciting crafting activities for many age groups. You can enjoy competing with each other at building and launching the best air rocket, making your own color changing UV light reactive bracelet, or any one of our other great activities.
